Variable Investment Option Performance Update

Metropolitan Life Insurance Company

The performance data quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance data quoted. Performance current to the most recent month-end may be viewed at www.metlife.com. The account balance is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. For Investment Divisions that invest in Portfolios of the underlying Trust that were in existence prior to the Investment Division inception date, these returns have been adjusted to reflect the charges and expenses of the Preference Plus Account Variable Annuity, as if the contract had existed during the stated period(s), including all Portfolio-level expenses and the Separate Account Charge of 1.25%. These results do not reflect the withdrawal charges which begin at 7% and decrease over 7 years (for returns reflecting these charges, see the Standardized report pages in this document that follows this Nonstandardized report). These figures represent past performance and are not an indication of future performance.

Non-Standardized Performance: Without surrender charges applied as of 04/30/2023

Current performance may be lower or higher than the performance quoted.

This is past performance and is no guarantee of future results.

A MetLife investment option may have a name and/or investment objective similar to that of another mutual fund with the same manager. Despite any similarity, the MetLife option is separate and distinct and will not have the same performance. Different performance will result from different investment policies, cash flows, fees, expenses and fund asset sizes.

The performance shown may reflect, for some periods described, the management of previous investment managers. Please see the prospectus for more information.

A fee waiver or expense limit may be or have been in place for any of the investment options. The reduced expenses that may result from this waiver or limit may increase performance results. Please see the prospectus for more information.

Certain investment options may have adopted, with respect to certain classes, a distribution plan under Rule 12b-1 of the Investment Company Act of 1940. MetLife is paid the 12b-1 fee under the plan. Please see the prospectus for more information.

While diversification through an asset allocation strategy is a useful technique that can help to manage overall portfolio risk and volatility, there is no certainty or assurance that a diversified portfolio will enhance overall return or outperform one that is not diversified. An investment made according to one of these asset allocation models neither guarantees a profit nor prevents the possibility of loss.

Asset allocation portfolios are "fund of funds" portfolios. Because of this two-tier structure, each asset allocation portfolio bears its own investment management fee and expenses as well as its pro rata share of the management fee and expenses of the underlying portfolios. The Contract Owner may be able to realize lower aggregate expenses by investing directly in the underlying portfolios instead of investing in an asset allocation portfolio. In that case, you would not receive the asset allocation services provided by an investment adviser.

Investment Performance Is Not Guaranteed.

Variable annuities are long-term investments designed for retirement purposes. Variable annuities have limitations, exclusions, charges, termination provisions and terms for keeping them in force. There is no guarantee that any of the variable investment options in this product will meet its stated goals or objectives. The account value is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. All product guarantees, including optional benefits, are subject to the claims-paying ability and financial strength of the issuing insurance company. Please contact your financial professional for complete details.

Distributions of 401(k), 403(b) or 457(b) salary reduction contributions allocated to an account, and any earnings on such contributions, are generally not permitted prior to attaining normal retirement age under the retirement plan except under certain circumstances, such as an individual's severance from employment with the employer sponsoring the plan or the individual's death, disability or hardship (or 457(b) unforeseeable emergency) as permitted under the plan. Distributions of contributions and any earnings may also be restricted as defined in the plan documents. Contact the plan administrator to determine when and under what circumstances the individual may request a distribution from the plan. Where permitted, distributions of taxable amounts are generally subject to ordinary income tax and, if made before age 59½, may be subject to a 10% federal income tax penalty. In the case of 457(b) governmental plans, there is no 10% federal income tax penalty except that the 10% federal income tax penalty may apply to distributions of amounts previously rolled over to a governmental 457(b) plan from another type of employer retirement plan or IRA. Consult a tax advisor to determine if an exception to the 10% federal income tax penalty may apply.

While diversification through an asset allocation strategy is a useful technique that can help to manage overall portfolio risk and volatility, there is no certainty or assurance that a diversified portfolio will enhance overall return or outperform one that is not diversified. An investment made according to one of these asset allocation models neither guarantees a profit nor prevents the possibility of loss.

Asset allocation portfolios are "fund of funds" portfolios. Because of this two-tier structure, each asset allocation portfolio bears its own investment management fee and expenses as well as its pro rata share of the management fee and expenses of the underlying portfolios. The Contract Owner may be able to realize lower aggregate expenses by investing directly in the underlying portfolios instead of investing in an asset allocation portfolio. In that case, you would not receive the asset allocation services provided by an investment adviser.

Investment Performance Is Not Guaranteed.

Variable annuities are long-term investments designed for retirement purposes. Variable annuities have limitations, exclusions, charges, termination provisions and terms for keeping them in force. There is no guarantee that any of the variable investment options in this product will meet their stated goals or objectives. The account value is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. All product guarantees, including optional benefits, are subject to the claims-paying ability and financial strength of the issuing insurance company. Please contact your financial professional for complete details.

Distributions of 401(k), 403(b) or 457(b) salary reduction contributions allocated to an account, and any earnings on such contributions, are generally not permitted prior to attaining normal retirement age under the retirement plan except under certain circumstances, such as an individual's severance from employment with the employer sponsoring the plan or the individual's death, disability or hardship (or 457(b) unforeseeable emergency) as permitted under the plan. Distributions of contributions and any earnings may also be restricted as defined in the plan documents. Contact the plan administrator to determine when and under what circumstances the individual may request a distribution from the plan. Where permitted, distributions of taxable amounts are generally subject to ordinary income tax and, if made before age 59½, may be subject to a 10% federal income tax penalty. In the case of 457(b) governmental plans, there is no 10% federal income tax penalty except that the 10% federal income tax penalty may apply to distributions of amounts previously rolled over to a governmental 457(b) plan from another type of employer retirement plan or IRA. Consult a tax advisor to determine if an exception to the 10% federal income tax penalty may apply.
